

Premium filling with no pre-treatment

Superior
adhesion

✓ to plastics and metals
✓ Saves time and money!

Ultrafill 3 is the new generation of body fillers that combines everything – no more pre-treatment, convenient application and excellent adhesion even on "hard-to-paint"-plastics like PP

Part No. 86801 – 500 ml aerosol (black), 86802 (grey), 86803 (white)

ULTRAFILL 3

New generation of 1K aerosol primer fillers with improved paint adhesion and no pre-treatment

- ✓ Improved adhesion capabilities on every surface – even on problematic PP without primer
- ✓ Increased paint viscosity and reduced solvent thinner improves film build and laydown - fills fast, saves material and time
- ✓ New developed "high dome" valve reduces impingement on the valve cup and therefore reduces the chance of drips for a better and more convenient application
- ✓ Very flexible - flexes with plastic & metal components

Did you know ...

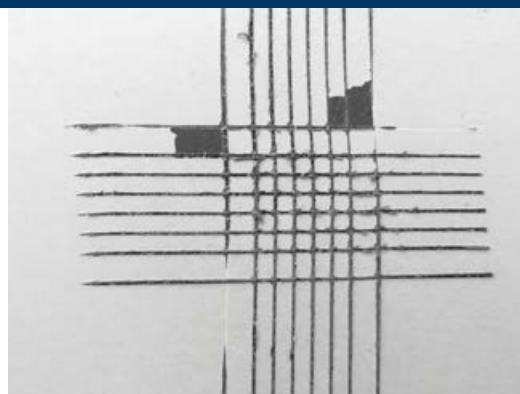

- ... that the main challenges come from the **increased use of polymeric materials within the automotive industry**, driven primarily by the need to reduce weight to hit emission targets
- ... that our new formulation has perfect **“ISO 0” (zero paint removal, ISO 2409)** cross hatch adhesion to the Polypropylene composites, as well as **excellent inter-coat adhesion** with brands of water-based refinish paint
- ... that official tests show **no cracking or delamination with the Ultrafill paint film** being unaffected. It was proven that the dried paint film **stays highly flexible and resistant to cracking and physical stress forces**
- ... Ultrafill 3 comes with **improved in-can anti-settlement properties, a new valve system and improved viscosity**

Test	Ultrafill 3 Score 1-10	Ultrafill 2 Score 1-10	Explanation of Ultrafill 3 performance
Ball-release	8	7	Good and short time
Spray pattern	9	6	Very good – close to not needing to sand
Covering behavior	8	7	Better covering in first layer
Levelling characteristics	9	7	Very good with nearly no visible orange peel after three layers
Flash-off time	9	8	Good, also with colder temperatures
Drying properties	8	8	Good and on same level as Ultrafill 2
Adhesion on metal and plastics (PP, EPDM etc.)	10	8	Very good – even on PVC, PP etc.
Sanding properties	9	8	Very good dusting and flattening

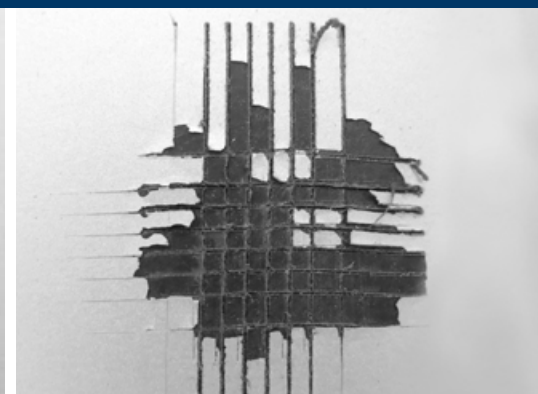

Cross Hatch Test (DIN ISO 2409) - Ultrafill 3 vs Ultrafill 2 vs Standard filler

Ultrafill 3 – extraordinary performance on PP + EDPM without pre-treatment

Ultrafill 2 – good performance on PP + EDPM without pre-treatment

Standard product – low performance on PP + EDPM without pre-treatment
